Finally, a place to tie a rope

You've finally managed to get that long and bulky item into your vehicle but now you can't find a secure place to tie it down or to keep the trunk or hatch closed. Let's face it. There's nowhere on most new-vehicle plastic bumpers to fasten a rope, strap, wire or bungee cord, so the Kurgo Trunk Cleat might be just the answer to your tie-down woes. Developed and manufactured by

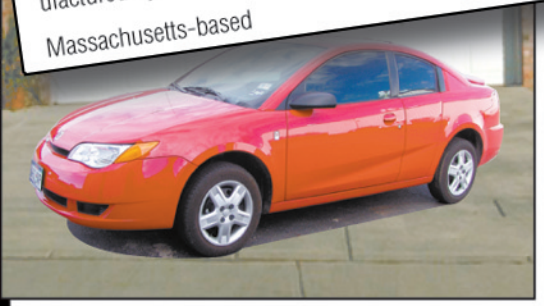

Motivation Design LLC., this unique license-plate frame incorporates a convenient hook/attachment point. Whether it's a Christmas tree, bike, lumber, roll of carpet or big box, simply hook your tied-down strap onto the Kurgo Trunk Cleat. The rust-free metallic device fits all standard license-plate frames. For more information, call 1-877-847-3868 or check out www.Kurgo.com.
