KURGO & TOYOTA KEEP PETS SAFE

SALISBURY, Mass.—Kurgo recently partnered with Toyota to support the launch of the pet-friendly 2009 Toyota Venza.

The 2009 Venza has been designed with pet-friendly features, including a large cargo capacity, a large rear cargo opening and a rear hatch that allows for easy entry and exit. All 2009 Toyota Venzas are also equipped with pet ramps.

Specially selected Kurgo accessories will be available through dealerships, including the wander hammock, a waterproof hammock-style seat cover; the skybox booster seat, a safe, secure way for pets to ride; the auto zip line, a nylon webbed line that attaches to create a tether run; and the backseat barrier, which creates a wall between the front and back seats to lessen driver distraction.
